LAUNCH PRESENTATION

GlowHost Web Hosting Packages **Professional Shared Web Hosting****Starting at \$6.99/month**

Our Professional Shared Web site hosting packages are ideal for small to medium-sized business and high-traffic personal sites that demand the most reliable web presence available in a shared hosting environment. These shared web hosting packages offer the highest possible uptime guarantee, and are considered the best choice for business hosting customers looking for maximum reliability without a dedicated server.

[View Hosting Plans](#) **Reseller Web Hosting****Starting at \$24.95/month**

Reseller web hosting is great for private label web hosting companies, web design firms, large corporate sites or can also be used for singular, large-scale established websites that require "near" dedicated server options.

[View Hosting Plans](#) **Dedicated Servers****Starting at \$149.95/month**

Full root access on managed and unmanaged plans. Dedicated servers are for large scale websites that have exceeded the level of service that can be provided with standard shared hosting, or site owners and organizations that simply prefer to host in an unshared environment. We offer fully managed and unmanaged dedicated server options. We also offer PCI compliant dedicated server solutions for online merchants who may be required by law to host in an unshared hosting environment.

web hosting faster than a supercharged V-8.

 **Unlimited Domain Shared Web Hosting****Starting at \$4.99/month**

Our New Unlimited Domain Budget and Advanced Shared Web hosting packages offer the ability to host unlimited sites. These web hosting packages come with the maximum available disk space and transfer in exchange for a slightly lower uptime guarantee than our Professional Shared Hosting packages. These servers are great for startup websites and developers looking to save on costs for newly conceptualized web sites.

[View Hosting Plans](#) **Semi-Dedicated Servers****Starting at \$49.95/month**

Fully Managed Semi-Dedicated Servers are a guaranteed 1/30th share of a traditional dedicated server. These are a great transition before moving your single web site to a full-blown dedicated server. Fewer sites means better performance...

[View Hosting Plans](#) **VPS - Virtual Private Servers****Starting at \$55.00/month**

Virtual Private Servers are a great "next step" in the transition from a reseller hosting package or semi-dedicated hosting package before going to a full-blown dedicated server solution. Full root access and guaranteed resource limits make VPS an excellent choice for those that want similar functionality, reliability and performance of a dedicated server, but at a fraction of the cost of a fully dedicated server solution.

get one more reason to choose glowhost

You should feel secure with your hosting provider. That's why all of our hosting packages include a comprehensive, **corporate-grade email bundle**. These accounts include extensive virus screening, flood control, and user-configurable "Spam-Stop" spam filtration featuring SpamAssassin. We support the most popular email configurations including POP3, SMTP, IMAP, Webmail, Web-based email and more. Our email hosting services are ideal for beginners with small sites and established large-scale corporate or group web sites.

"GlowHost is a very reliable provider, with personal-level support. Their control panel is sweet. GH is by far the best provider I have used in the last seven or so years, and I have been through four other providers in that time."
